

MICAH GEARHART

INFORMATICS CONSULTANT

gearhoo6@umn.edu
(651) 246-9993

Profile

Informatics analyst for data-intensive biomedical research projects requiring integrative approaches and effective visualizations.

Skills

Cutting-Edge Informatics

Current with latest algorithms and genomics techniques.

Reproducible Research

Enabling robust and open analyses that can be updated as tools evolve and moves science forward.

Teaching & Mentoring

Expanding knowledge and enabling researchers with tools for independent data exploration.

Unique Qualifications

Biology Background

Trained in structural biology, transcriptional regulation and developmental biology.

Project Diversity

Specializing in unique projects not suited to conventional analyses.

Collaborative Analysis

Communicate with research team members to promote more meaningful approaches.

Employment

University of Minnesota

Bioinformatics Consultant, Genetics Cell Biology and Development

2014-present

Collaborate with investigators to analyze and interpret next generation sequencing data. Facilitate transfer of knowledge regarding bioinformatics tools and statistical methods for functional genomics to research groups.

Research Associate

2007-2014

Professor Vivian J. Bardwell

Education

University of Minnesota

Post-Doctoral Associate

2001-2007

Professor Vivian J. Bardwell

The Scripps Research Institute

Doctoral Student

1995-2001

Professor Peter E. Wright

Harvey Mudd College

1991-1995

Bachelor's of Science in Chemistry

Informatics Projects

Murphy MW, Lee J, Rojo S, **Gearhart MD**, Kurahasi K, Banerjee GL, Bashamboo A, McElreavey, K, Zarkower D, Aihara H, Bardwell VJ, "An ancient protein-DNA interaction underlying metazoan sex determination", *Nat. Struct. Mol. Bio.*, 2015 Jun;22(6):442-51.

This project relied heavily on my training in biochemistry, structural biology and genomics. An R package with custom software written specifically for this project is available at <https://github.com/micahgearhart/exotools> to assist other researchers attempting similar projects.

"Sexual cell fate reprogramming in the ovary by DMRT1", *Current Biology* 2105 16(25) 1-8.

Cutting edge analysis of RNA-seq and Single Cell RNA-Seq data were used to help elucidate how cells in the female ovary transdifferentiate into their male counterpart. A reproducible workflow can be found at <https://github.com/micahgearhart/cag-dmrt1>.
